TRAILS

of Stratham Hill Park and the surrounding forest lands

This map depicts the Stratham Hill area forest trail network that weaves between three hills: Stratham Hill, Long Hill and Jewell Hill. Trail markers are located at the beginning of each trail to help identify one from the other. The presence of these sloping terrain add a certain degree of challenge to an otherwise fairly level series of interconnecting trails.

Please show respect for the natural environment which these trails, fields and launches encompass and practice the "leave no trace behind" philosophy.
