Interested firms are encouraged to submit succinct, well-organized proposals where the requirements of this RFP can be easily identified. Sealed proposals are due by June 18th, 2026, by 3:30 PM, either by mail or personal delivery. Proposals received after that due date and time will not be considered.

PROJECT DETAILS

DESCRIPTION:

The Stevens Park existing parking area currently provides approximately 84 parking spaces and has experienced deterioration over time, including pavement failure along edges and corners, as well as areas of standing water due to inadequate drainage.

This project will include full reconstruction of the parking area to address structural deficiencies, improve drainage, and increase parking capacity. The proposed layout expands the lot to include a total of 96 standard parking spaces and 6 accessible spaces in compliance with ADA requirements.

Additional improvements include the construction of a designated drop-off lane and an expansion of the parking area approximately 8.5 feet toward the adjacent soccer fields.

The parking area reconstruction work shall be coordinated with the Stevens Park Pavilion project and is anticipated to occur following completion of the pavilion construction and associated utility work. Contractors shall account for coordination and sequencing of work activities accordingly.

Upon request, the Town will provide a paving and curbing plan prepared by Emanuel Engineering, which shall serve as the basis for all work performed under the awarded contract.

SCOPE OF SERVICES

The Contractor shall furnish all labor, materials, equipment, and supervision necessary to complete the project in accordance with the plans prepared by Emanuel Engineering and all applicable standards.

The work shall include, but is not limited to, the following:

Removal and Reconstruction:

- Full-depth removal and reconstruction of the existing parking area pavement structure
- Removal and disposal of existing asphalt, base materials, and failing curbing as required
- Excavation of unsuitable subgrade materials where necessary

Site Preparation and Base Installation:

- Regrading and preparation of subgrade to support new pavement structure
- Installation of gravel base and subbase materials in accordance with project specifications

Drainage Improvements:

- Correction of existing drainage deficiencies contributing to ponding and surface water accumulation
- Adjustment, installation, or replacement of drainage features as shown on the plans

Please include any exclusions you’ve made in your proposal.
