

# STRATHAM SEPTIC SYSTEM VULNERABILITY ASSESSMENT

With funding from the Piscataqua Region Estuaries Partnership (PREP), FB Environmental Associates (FBE) in partnership with the Town of Stratham plans to conduct a Septic System Vulnerability Assessment to:

- **INVENTORY SEPTIC SYSTEMS**
- **IDENTIFY AREAS AT RISK OF SEPTIC SYSTEM FAILURE**
- **ASSESS POTENTIAL NUTRIENT AND BACTERIA LOADING**
- **INCORPORATE CLIMATE CHANGE CONSIDERATIONS**

This assessment will ultimately guide future policy decisions in Stratham.

## SEPTICSMART WEEK IS SEPTEMBER 16-20!

Septic systems also pose public health and water quality concerns if not properly maintained, are easy to forget once installed, and are expensive to replace. SepticSmart Week is an annual event that occurs in the third week of September to bring attention to the importance of caring for and maintaining septic systems.

Be on the lookout for a community workshop in the Spring of 2025!

**THIS PROJECT IS A PARTNERSHIP BETWEEN THE TOWN OF STRATHAM, PREP, AND FBE**
