DISCUSSION

Lovejoy indicated that tonight's meeting had not been properly posted, therefore no actions would be taken. Dane had prepared a report on the current status (as of 8/30) of the survey still in progress and it was decided that the report could proceed as planned.

The status was presented and discussed. The Committee considered the response rate to be good (500 residents). The survey remains open until 9/10.

Other discussion related to timing of the AER study and the water- sewer infrastructure study. Both are due in October. Also discussed next steps for Committee including how to get information to the residents and looking ahead to Town Meeting.

For the next meeting the Chair asked members to consider milestones needed to bring a TIF to the March 2019 Meeting.

MEETING HANDOUTS

No handouts. Dane used a PowerPoint presentation to show interim survey results.
