Squamscott River Navigation Span Closure Notice – REVISED DATES

Reference: Pan AM RR Bridge #8.69
Stratham, NH 03885
Great Bay Bridge Repair

To Whom It May Concern,

CPM Constructors will be closing the Squamscott River navigation span to Great Bay located in Stratham, NH from June 24th to June 27th. The reason for this closure is to repair the pier cribbing for the RR span over the Squamscott River. CPM Constructors will have barges and workboats in the navigation span area during this time. Possible alternative access points for anyone looking to gain access to Great Bay during May 16th to May 19th is the Newmarket landing on the Lamprey River in Newmarket, NH and the Adams Point Landing on Great Bay in Durham, NH. From June 14th to June 23rd CPM will have a presence in the area setting up access. The navigation span will be open during that time but at times will be restricted from its original 30 ft width down to 20 ft.

Project Location:

Pan AM Railway Bridge #8.69 – Great Bay Bridge is located approximately 1.2 miles north of Chapmans Landing on the Squamscott River located off Route 108 in Stratham.
