

Trail Management Advisory Committee

July 21st

Stratham Municipal Center

Meeting Material

Here are two companies that offer solutions to getting a user count on our usage on the trails at Stratham Hill Park. Having a better understanding on who, what and when are using the trails is vital to the future planning of the trails at Stratham Hill Park.

<https://www.eco-counter.com/> , now being used by NEMBA (New England Mountain Bike Association)

<https://www.trafx.net/products> , used by the US Fish and Wildlife Service

Eco Counter requires us to request a quote, which I have requested.

Trafx will cost around \$2,500
