SPECIAL MEETING

MINUTES OF THE MARCH 29, 2024 SELECT BOARD MEETING

MEMBERS PRESENT: Board Members Chair Mike Houghton, Vice Chair Allison Knab, Joe Anderson

The Board Chair opened the meeting at 1:30 pm.

Mr. Anderson opened the meeting and motioned to enter into a non-public session in accordance with RSA 91-A:3, II(a and c). Mr. Houghton seconded the motion. Roll call: Houghton-yes; Knab-yes; Anderson-yes

At 3:30 pm Mr. Anderson motioned to come out of the non-public session and to seal the minutes noting failure to do so may render a proposed action ineffective. Mr. Houghton seconded the motion then motioned to adjourn. Mr. Anderson seconded the motion. All voted in favor.

MINUTES OF THE APRIL 1, 2024 SELECT BOARD MEETING

MEMBERS PRESENT: Board Members Chair Mike Houghton, Vice Chair Allison Knab; Joe Anderson

ALSO PRESENT: Town Administrator David Moore, Finance Administrator Christiane McAllister, Fire Chief Jeff Denton, Police Chief Anthony King

At 6:30 p.m. Mr. Houghton called the meeting to order and moved to go into a non-public session in accordance with RSA 91-A:3, II (a) Personnel. Ms. Knab seconded the motion. Roll call: Houghton-yes; Knab-yes; Anderson-yes.

At 7:01 pm the public meeting resumed. Mr. Houghton moved to seal the minutes noting failure to do so may render a proposed action ineffective. Ms. Knab seconded the motion. All voted in favor.

At 7:01 pm Mr. Houghton asked for a motion on the minutes. Mr. Anderson motioned to accept the minutes of March 18 and March 27, 2024. Ms. Knab seconded the motion. All voted in favor.

Mr. Houghton recognized Fire Chief Jeff Denton for his department report. On March 19th at the Stratham Fire Dept. Association meeting, the members officially voted him as Chief for the next two years. Chief Denton praised the Stratham Police Department, noting they had a difficult call overnight and Chief King and his officers were instrumental in making it go smooth. Chief Denton continued, noting the department is moving forward with the ESO transition for the Fire Dept. Database program. This brings in extra capability regarding records reporting. Peggy Crosby is the Project manager for this project.

Chief Denton called attention to the Outdoor Special Event Emergency Operations Plan that he, Police Chief King and Parks and Recreation Director Seth Hickey have created. They will continue to refine it, adding parameters and thresholds for implementation. Mr. Anderson inquired about the approval process. Chief Denton explained that because each department requires its own special permits, an applicant would initially go to the Building Dept. From there, the department(s) that should be involved would be notified. The plan will remain flexible. They continued to talk about items that might be included. The Board felt they were on the right path. Chief King added that the plan is comprehensive and addresses all emergency events. Ms. Knab expressed concern about overburdening families wanting to rent the pavilions. Criteria that would trigger the process would depend on the type of event. Once the plan is finalized, it will be updated on a regular basis. They will continue to work on the plan and bring it back to the Board.

Next Chief Denton sought guidance on planning for truck replacements. The forestry truck is due to be replaced in 2025; Engine 3 is scheduled for replacement in 2028. There is a two to three year wait from the time the order is placed. The new ambulance is scheduled to arrive in September; a year after the 12 - 16 months agreed to in our contract. In order to plan for rolling

stock in 2025, Mr. Moore advised that they revisit the timing strategy during the discussions of preparing the CIP in the fall of this year.

Chief Denton reported working on the Standard Operating Guidance for the new door trainer and VEIS room training devices. Training to begin late spring on these devices.

Chief Denton reported that several business in town are undertaking projects which have been time consuming due to code enforcement and power issues.

Finally, Chief Denton reported on several calls they've responded to, including assisting Greenland with a structure fire at 2:00 am and an EMS trauma call earlier today.

Mr. Houghton moved to the Public Comment portion of the agenda. Resident Robbi-Lyn Ward, 141 Stratham Heights Road, said that she and her husband Kevin purchased their home in 2020. She spoke about a significant amount of water draining into their yard, their driveway and their basement. It is her contention that when developments were created, there was no plan for proper water drainage. As a result, her driveway and yard are flooded with water from several different sources. She has met with DPW and Planning personnel who have done site walks on her property. She wants to Town to define the authority for the placement of a culvert she contended is located on her property and to stop the water. Mr. Houghton vowed to bring together resources to better understand the situation and that the Town will respond.

At 7:46 pm Mr. Houghton motioned to go into a non-public session in accordance with RSA 91-A:3, II (a) Personnel. Ms. Knab seconded the motion. Roll call: Houghton-yes; Knab-yes; Anderson-yes.

At 10:13 pm Mr. Houghton motioned to come out of the non-public session and seal the minutes noting failure to do so may render a proposed action ineffective. Ms. Knab seconded the motion. All voted in favor.

Mr. Houghton moved to the agenda item regarding Mr. Hopping. Ms. Knab motioned to recommend naming the home dugout at Stevens Park after long-time baseball coach and mentor John Hopping after receiving such positive reports on him and to authorize a sign to be erected in coordination to be approved in form and content by Town Administration. Mr. Anderson seconded the motion. All voted in favor.

Mr. Houghton called attention to the request for a Permit to Bait. The Board decided not to approve the permit.

Next Mr. Houghton moved to the Stormwater Agreement and Performance Agreement for Chase Bank. Ms. Knab authorized the Chair to sign the agreements for Chase Bank, 28 Portsmouth Avenue. Mr. Houghton seconded the motion. All voted in favor.

Mr. Houghton moved to the Trail Management Advisory Committee item on the agenda. Ms. Knab wanted to amend their charge to act as an advisory committee to the Town and Select Board in conjunction with other stakeholders.

Mr. Houghton directed attention to the Select Board liaisons. Ms. Knab noted she attends the Stratham Hill Park Association meetings. They decided to continue the liaisons as they are.

ADMINISTRATION

Mr. Moore reported that as a result of the rains and the underground installation of the propane tanks, the raised beds cannot go where they were planned. Alternative locations have been identified and new beds initially placed; the Board was comfortable with the new locations.

CORRESPONDENCE

Mr. Moore reported that Nate Merrill, Heritage Commission, requested the materials noted in the Archaeological letter be returned to the Town. The Board agreed.

Mr. Moore called attention to the Library Proclamation.

INFORMATIONAL ITEMS

Mr. Moore reported that as a result of a discussion from the prior board meeting, he, Ms. McAllister and Mr. Stevens are making great progress on planning for capital reserve. Ms. McAllister is creating a document that will allow us to track rolling stock much better. Mr. Houghton emphasized it will be important to recalibrate based on inflation.

Mr. Moore advised them that the Public Works open house will be May 22. We will be publicizing it soon.

Mr. Moore asked the Board to authorize him to sign the form to designate Will Dinsmore as our Health Officer. Mr. Anderson voted to identify Will Dinsmore, Building Inspector, as our Health Officer for the Town of Stratham. Ms. Knab seconded the motion. All voted in favor.

Mr. Moore reported concern about the impact of two colonies of beavers in the park. He advised that a policy recommendation is being developed and will update the Board.

RESERVATIONS

Ms. Knab motioned support for refunding the amount of \$400 to the Seacoast Beekeepers Association of NH for their use of the Sewall Room as they have obtained non-profit status. Mr. Anderson seconded the motion. All voted in favor.

Ms. Knab motioned support for waiving the fee for the Connors Climb Foundation for their use of the Front Pavilion on May 16th. Mr. Anderson seconded the motion. All voted in favor.

Mr. Anderson motioned to approve the Great Bay 5K Road Race use of the Front Pavilion on October 26, 2024 and to waive the fee. Mr. Houghton seconded the motion. Ms. Knab abstained because she is involved with the requesting party. Motion passed.

APPOINTMENTS

Ms. Knab motioned to re-appoint Gale Lyon, Kathy Bower and Michele McCann-Conti as Alternates to the Wiggin Memorial Library Board of Trustees for a one year term as

recommended by the Library Board of Trustees. Mr. Anderson seconded the motion. All voted in favor.

Ms. Knab said that she would not be able to attend the Seabrook drill on Wednesday due to a previous engagement.

At 10:40 pm Ms. Knab motioned to adjourn. Mr. Anderson seconded the motion. All voted in favor.

Respectfully submitted,

Karen Richard Recording Secretary

Notes:

Notes:

Notes:

Notes:

To whom it may concern,

I would like to get permission to bait deer for bow hunting, which would entail.

- Setting up a tree stand
- Setting up a trail camera
- putting out deer feed

There will be no trapping of any sort of wildlife

Thank you,

James Neal

NOTE: SEE BELOW FOR IMPORTANT INFORMATION AND INSTRUCTIONS!

Baiting: The act of placing meat, carrion, honey, or any other food or ingestible substance capable of luring or attracting coyote, fur-bearing animals, or game animals with the exception of gray squirrel (207:1 II-a)

No person may bait wildlife on the property of another unless he has secured from the owner or occupant of the property upon which the bait is to be deposited a permit (Permit To Bait Wildlife) in writing, signed by the owner or occupant, and until he has filed a copy of the permit with the NH Fish and Game Department as specified below, together with a USGS map or copy thereof showing the specific location of the bait site (207:3-d).

On state-owned or state-managed lands (National Forest) permit applications will be accepted at any time, except applications for baiting bear and deer shall not be considered unless received by the Dept. or postmarked between the first Monday in June and the first Monday in August. Note: Special rules apply for the Connecticut Lakes Headwaters Forest baiting permit lottery (see Fis 307.05(k)).

• If baiting on state-owned or state-managed land: One copy with map attached shall be submitted by hand or mailed to the Law Enforcement Division, NH Fish and Game Department, 11 Hazen Drive, Concord, NH 03301. Once it has been approved, our office will send you the signed permit.

On lands other than state-owned or state-managed, permit applications shall not be considered unless received by the Dept. or are postmarked on or before the first Monday in August if baiting for bear, or received by the Fish and Game Department or postmarked on or before the first Monday in October for all other species, except applicants may apply beginning December 1 for permits to bait coyote for the following year.

Prior to the placement of any bait, copies of this permit shall be distributed as follows:

- Original to be retained by permittee.
- One copy to be left with the landowner.
- If not baiting on state-owned or state-managed land: Two copies with map attached shall be submitted by hand to or mailed to the Wildlife Division, NH Fish and Game Department, 11 Hazen Drive, Concord, NH 03301. Other than for deer or bear, the permittee shall not place any bait until 3 days after the date of postmark during the open season.

General Rules

A permit to bait wildlife shall be valid for a single permittee only and shall have only that permittee's name entered on the permit. No person other than the permittee is authorized to place bait. At each bait site, an identification sign at least 3 x 6 inches in size shall bear the name and address of the person placing said bait, and shall bear the names of not more than 2 other persons permitted to hunt over the bait (excluding guides).

No identification sign at a bait site shall be altered by substitution or by changing of the names listed thereon during the open season for taking bear.

A person with a current hunting license may be allowed a maximum of 2 active balt sites, depending on the species and WMU. A bait site shall be considered active if the balting season for the species allowed on the permit to balt wildlife is open or if no specific expiration date is noted on the permit form.

No person shall engage in the act of baiting for fur-bearing animals, including coyote or game animals, with the exception of gray squirrel from April 15 to August 31. No person shall place bait less than 300 feet from a dwelling or public roadway, path, or trail.

From the close of the season to take bear with the aid and use of bait thru December 15, baiting for coyote shall be restricted to the use of meat, animal parts, carrion, or fish.

No person shall use the aid of bait to take wild turkeys.

This permit does not convey any rights other than permission to bait the wildlife species indicated according to the laws of the State of New Hampshire, subject to whatever stipulations the landowner may prescribe.

This summary of the baiting regulations is intended only as a guide. The complete Fish and Game Laws may be viewed at www.wildlife.state.nh.us

MEMORANDUM

TO:	Select Board							
CC:	David Moore, Town Administrator; Christiane McAllister, Finance Administrator							
FROM:	Tim Stevens, DPW Director							
DATE:	March 29, 2024							
RE:	2024 Fiscal Year DPW Equipment Purchases							

This memorandum is written in follow-up to the March 5th Select Board discussion during the DPW quarterly report regarding the departmental update to the rolling stock inventory and equipment list and proposed replacement schedule on March 5th. This memo summarizes the findings of the work to date and is intended to be responsive in answer Board questions related to *prioritization of requested 2024 equipment purchases* determinations and *useful life assumptions*.

NEXT STEPS: David Moore, Christiane McAllister and I are working to present update schedules based on this memo. Please consider this an interim update on our work.

Summary of rolling Stock and Equipment Analysis to Date

As you know, I presented an updated inventory, significant developments or themes included:

- 1. Restoring a missing heavy duty vehicle not previously listed or scheduled for funding and replacement;
- 2. The opportunity to plan holistically for Park related equipment and DPW equipment previously acquired and managed independently during a previous organizational structure.
- 3. The existence of several pieces of mowing equipment in deteriorating shape and in need of expensive repairs and/or replacements.

In addition, the overall replacement schedule included suggestions for acquiring new equipment that will facilitate more flexible, timely and efficient job requirements. This includes ability to maintain field space and edges in Stratham Hill Park as requested by the Conservation Commission and Park Association;

roadside mowing of vegetation; and maintenance of ROW and drainage ditches and swales. All projects that have not been performed or only performed in accordance with rental equipment opportunities, etc.

Useful Life

We have adjusted the materials referencing useful life of the heavy duty and medium duty equipment to utilize additional 20-year useful life and are preparing to present a new roster utilizing these assumptions.

Prioritization of requested 2024 equipment

Below is a list of the 2024 equipment spoken to on March 5th in order of priority for the department.

• Tracked Excavator with Attachments (New # \$200,000)

Our department requires a tracked excavator equipped with a grading bucket, digging bucket, and a forestry mulch head. The versatility of this equipment will significantly enhance our ability to undertake more efficient excavation and grading tasks and will allow for more effective grading and land clearing as needed.

Heavy Duty Tag Trailer (New # \$40,000)

To facilitate the transportation of heavy equipment to and from worksites, we require a heavy-duty tag trailer capable of safely moving our equipment. This investment will ensure that our equipment remains mobile and readily available for deployment whenever necessary.

• Large 72inch Commercial Mower (\$18,800):

 Our current 72inch mower, which has served us for the past 10 years, needs extensive repairs totaling over \$5,000. Therefore, it is prudent to invest in a new 72inch mower to replace it. This mower will enable us to maintain the green areas at the volume needed to meet demand.

• Stand-On Commercial Blower (\$10,500):

 The acquisition of a stand-on commercial blower is critical for our seasonal clean-up operations, particularly during the spring and fall. It will also prove invaluable for year-round maintenance tasks, ensuring public spaces remain clean and safe for residents.

• Tracked Skid Loader (\$100,000):

 We also seek approval for the purchase of a tracked skid loader. This versatile piece of equipment will enhance our ability to undertake various tasks, including material handling, site preparation, and snow removal, especially in challenging terrain conditions. These proposed purchases have been carefully evaluated, taking into consideration the operational needs of the DPW and the expected long-term benefits they will provide. We believe that these investments are essential for maintaining and improving the quality of public services we deliver to the community.

for Mini Excavators Brown RAPTOR X1/X2 Mulching Heads

the attachment that's been on your wish list. Transform your mini excavator into a multifaceted profit generator Introducing the Brown Raptor, our compact yet mighty head. Tailored for compact excavators, the Brown Raptor is

Highlights:

- Engineered for 10,000 lb and above Mini-Excavators, our GEAR MOTOR design requires NO CASE DRAIN
- Ideal for tasks such as roadside clearing, field upkeep, and domestic projects
- Department of Transportation's seal of approval
- Perfect addition to rental fleets
- Expect extended tool longevity with a low-cost fixed tooth drum, ranging between 300 to 600 hours
- Swift tooth replacements with a one-bolt tooth design
- Quick-change system with a bolt-on excavator attachment feature switch mounts for various mini excavators effortlessly.
- Modular blueprint allows for straightforward motor swaps and attachment point alterations
- Direct Drive ensures maximum power transmission
- Cutting tooth innovation facilitates easy slicing through both brush and trees
- Compatible with your excavator's thumb (given it's plumbed for dual operations)
- Robust bearings ensure longevity with a held/floating design
- Covered by a comprehensive 1-year manufacturer's warranty

COMPACT TRACK LOADER

PRELIMINARY

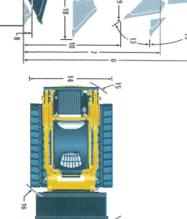

FEATURES:

underfoot conditions. The 259D3 features the following: flotation, stability and speed to work in a wide range of applications and standard, suspended undercarriage system provides superior traction delivers extended reach and lift height for quick and easy truck loading. Its The Cat® 259D3 Compact Track Loader, with its vertical lift design

- Industry leading sealed and pressurized cab option provides a cleaner and quieter operating environment with excellent work tool visibility
- Available high-back, heated, air ride seat with seat mounted adjustable joystick controls makes the D3 Series the industry leader
- High performance power train provides maximum performance and production capability through the Electronic Torque Management system, standard two speed travel and an electronic hand/foot throttle with decel pedal capability.
- High Flow hydraulic system is available for applications that demand maximum hydraulic work tool performance.

- Electronically controlled Cat C3.3B engine provides high horsepower emission standards. and torque while meeting U.S. EPA Tier 4 Final and EU Stage V
- Cat "Intelligent Leveling" system provides industry leading technology work tool return to dig, and work tool positioner integration, and available features such as dual direction self level,
- Standard fully independent torsion axle suspension combined with on rough terrain, enabling better load retention, increased productivity and greater operator comfort. the optional Speed Sensitive Ride Control system improves operation
- Maximize machine capability and control with optional Advanced response and creep control. Also features multi-language functionality with customizable layouts, security system and rearview camera. Display providing on-screen adjustments for implement response, hystat
- Ground level access to all daily service and routine maintenance points helps reduce machine downtime for greater productivity.
- Broad range of performance matched Cat Work Tools make the Cat Compact Track Loader the most versatile machine on the job site

RE: Potential PREPA Grant – Septic System Vulnerability Assessment

The Piscataqua Region Estuaries Partnership (PREP) is currently offering grant funds for community or municipal projects that protect natural resources and water quality or prepare for climate vulnerability. The grant program includes \$100,000 in funds with a maximum award of \$25,000. Please see https://prepestuaries.org/2024-prepa-grant-program/ for more information.

As you are aware, the Town is working with FB Environmental Associates (FBE) in order to help implement requirements of the EPA MS4 Permit and we have engaged in discussions with FBE regarding potential grant projects to help complement these efforts. We are proposing to conduct a town-wide Septic System Vulnerability Assessment, focusing on identifying areas susceptible to septic system leaks/failure or excess nitrogen/bacteria loading. Utilizing existing environmental GIS data, the assessment will identify vulnerable areas based on soil factors, proximity to water bodies, and climate change projections. Additionally, the project will launch the creation of a comprehensive septic system inventory/database for the town, with a focus on identifying and prioritizing the highest priority parcels and areas. The project's objectives include establishing a baseline inventory for continued management purposes, informing future ordinance changes, guidance on system maintenance strategies, recommendations regarding upgrades and the latest technology/systems, as well as targeted outreach efforts, particularly in nutrient or bacteria impaired areas.

The grant application would be for \$20,000 - \$23,000 in grant funds to cover the entire project cost. Of this amount, 15% will be allocated for community engagement activities, such as surveys, mailers, flyers, and potential events. The grant does not require or prioritize matching funds and therefore none would be required of the town aside from staff time to support the project. Grant applications are due April 26th, with project announcements and awards expected on May 16, 2024. If selected, the project will commence on June 3, 2024, and conclude by December 12, 2025. FBE is prepared to submit the grant on behalf of the Town.

Staff is seeking the Select Board's authorization to allow FBE, working in consultation with staff, to apply for the PREPA grant in an amount not to exceed \$23,000 in order to conduct a Septic System Vulnerability Assessment in Stratham.

Piscataqua Region Estuaries Partnership PREPA Grants 2024 Request for Proposals

REQUEST FOR PROPOSALS: Piscatagua Region Environmental Planning Assessment

The Piscataqua Region Estuaries Partnership (PREP) invites proposals from municipalities, watershed groups, and partnering organizations within the Piscataqua Region Watershed (see Appendix A.) for projects resulting in achievement of:

- One or more of the proposed actions for their community identified in the 2020 Piscataqua Region Environmental Planning Assessment (PREPA);
- planning or regulatory projects to protect natural resources and/or water quality; or
- projects related to climate vulnerability, adaptation, and/or preparedness.

Visit https://prepestuaries.org/resources/prepa/ to review results by municipality from the 2020 assessment.

PREP is one of 28 U.S. Environmental Protection Agency's National Estuary Programs, a joint local/state/federal program established under the Clean Water Act with the goal of protecting and enhancing nationally significant estuarine resources – including the Great Bay and Hampton-Seabrook Estuaries. As a watershed-based organization, PREP and its grant funding opportunities support the 52 municipalities across the Piscataqua Region Watershed (Appendix A). Funds for this grant opportunity are provided by EPA under the <u>Bipartisan Infrastructure Law</u>, and the grant program timeline assumes no disruption to anticipated funding cycle.

For 2024-2025 projects, eligible applicants may submit proposals requesting up to \$25,000 in grant funding. A total of \$100,000 is available for projects for 2024-2025. Applicants may request funding between \$5,000 and \$25,000 per project. Applicants are required to budget a minimum of 15% for community engagement. For example, a project seeking \$25,000 in grant funding must allocate at least \$3,750 of grant funding toward community engagement. Applicants are required to outline how the project will advance diversity, justice, and inclusion as part of the application. Contact Community Engagement Manager, Abigail Lyon, if you'd like to discuss this requirement further.

ELIGIBILITY

Municipalities, watershed groups, and organizations partnering with one or more municipalities in the Piscataqua Region Watershed (Appendix A). Watershed groups and organizations may submit more than one application if partnering with more than one municipality.

Example projects and average costs are listed below. If you'd like to discuss a project idea, please contact Abigail Lyon (<u>Abigail.Lyon@unh.edu</u> or (603) 862-3729).

- Adopt or increase buffer or setback regulations for wetlands, vernal pools, streams, buildings, or septic: \$10,000-\$15,000
- Complete a Natural Resource Inventory or Assessment for Master or Comprehensive Plans: \$20,000
- Adopt or update an Open Space Plan: \$15,000
- Adopt updated stormwater management regulations or ordinance: \$10,000-\$20,000

- Adopt updated model floodplain management standards that exceed the minimum federal regulations required to participate in the National Flood Insurance Program (<u>NH Office of Strategic Initiatives Menu of Higher Floodplain Regulation Standards</u> or <u>Maine Floodplain Management Program</u>): \$15,000
- Incorporate sea-level rise and climate change planning into Master or Comprehensive Plans or as separate chapters: \$10,000-\$15,000
- Complete the Maine Flood Resilience Checklist: \$5,000

REQUEST FOR PROPOSAL TIMELINE

February 26, 2024: Request for Proposals released by PREP.

February 26-April 26, 2024: Municipal officials (e.g., Planning Boards and/or Conservation Commissions) meet with consultant(s) to determine which project a municipality wants to pursue. Complete the application, review, and sign off on grant requirement documents (9 weeks).

April 26, 2024: Proposal Deadline - submit project application (PDF) by email (<u>Abigail.Lyon@unh.ed</u>) to PREP by 4 PM EST.

April 29-May 15, 2024: Proposal review and selection process (2.5 weeks).

May 16, 2024: Awards announced.

June 3, 2024: Projects begin.

PROJECT TIMEFRAME

Projects should be 12 to 18 months in duration and are expected to begin June 3, 2024 and conclude no later than December 12, 2025. This timeline assumes no disruption to anticipated funding cycle.

PROPOSAL REQUIREMENTS

- 1. **Proposal summary form**—Contains succinct information about the proposed project. PREP template must be used (Appendix B).
- 2. **Project budget form**—Submit a Project Budget Form (Appendix C). Identify your qualified consultant for this project.

An electronic copy (PDF) must be received by Abigail Lyon via email (Abigail.Lyon@unh.edu) no later than 4 PM EST on Friday, April 26, 2024. Faxed proposals will not be accepted.

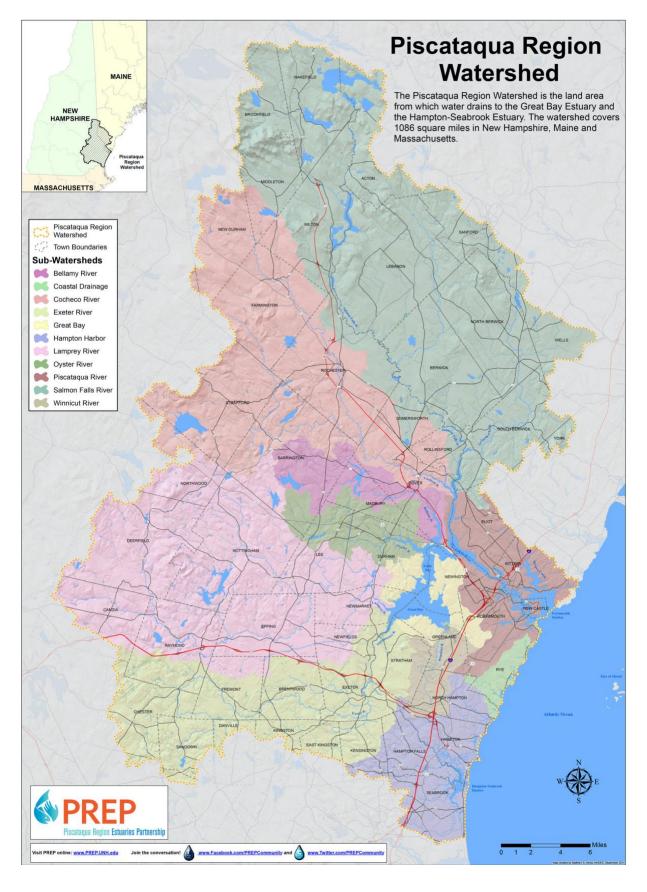

Direct questions to Abigail Lyon, PREP Community Engagement Manager, at (603) 862-3729 or Abigail.Lyon@unh.edu. Questions and answers will be shared online at https://prepestuaries.org/resources/prepa-grants/ up until April 26.

APPENDICES

Appendix A: Piscataqua Region Watershed map (not to be included in proposal submissions)

Appendix B: Proposal Summary Form Appendix C: Project Budget Form

Appendix B: Proposal Summary Form (not to exceed five pages; exclusive of budget)

Municipality/ies/Watershed Group/Organ	nization:
Name of Applicant(s):	·····
Project Title:	
Phone Number:	_ Email:
PREP Funds Requested:	Total Project Cost:
Project Summan & Provide a brief summa	ary of the project everall including the project goal

Project Summary: Provide a brief summary of the project overall including the project goal.

Connection to the 2020 Piscataqua Region Environmental Planning Assessment Action Items: Identify which of the 2020 PREPA actions the project will address or advance (i.e., adopting primary structure setbacks). If the proposed project does not advance a community specific action from the 2020 Piscataqua Region Environmental Planning Assessment, describe how the project protects natural resources or water quality.

Project Task Timeline: Identify project tasks and dates from start to finish. Specify in your timeline if your municipality requires a public hearing and/or town meeting vote to implement the project. (Keep in mind projects are expected to start June 3, 2024 and be completed by December 12, 2025. Adoption of new or updated regulations can occur outside the project period.)

Project Team: Identify roles and responsibilities for members of the project team.

Project Deliverable(s): Identify anticipated deliverables for the project. Examples include but are not limited to draft ordinance or regulation language, products to support community engagement, draft chapter language, etc. Deliverables must include a final report after project completion submitted no later than December 12, 2025; reporting template will be provided to awarded proposals.

Why is this the right time for this project? Does this project build on previous efforts? Why is your town ready? Will the project address priorities or needs identified by your community or the region? If so, how? For example, the Town has identified the need, is willing to make the municipal investment, Town board and/or public is ready for new policy, Town has the staff capacity to complete and implement project, project addresses a recommendation from the community in the Master/Comprehensive Plan, Climate Vulnerability Assessment/Hazard Mitigation Plan, etc.

Describe your approach to community engagement. How will the minimum 15% budgeted for community engagement be used to support public input, share project results, generate support for a regulation or zoning update and/or change behavior? How will your approach promote diversity, equity, justice, and inclusion? For example, using new approaches to gather input from a diverse set of community members,

bringing new voices into local decision-making, addrunderserved populations, etc.	essing an environme	ental issue that in	mpacts historically
☐ Is this project part of a multi-town effort? If checked	ed, specify towns.

RE: ZBA Rehearing Request – Stoneybrook Lane application

On April 2, 2024, the Zoning Board of Adjustment, by a vote of 3-2, voted not to grant the motion for rehearing, submitted by the Select Board, of the 13-15 Stoneybrook Lane decision to grant a variance in order to allow single-family housing, which in not a permitted use, in the Special Commercial zoning district. A copy of the draft meeting minutes from the Zoning Board's discussion is included for your review. A majority of three voting members of the Board cited various reasons for not granting the rehearing request, including that they did not feel that new information was submitted and that the decision to grant the variance was a legitimate and appropriate exercise of the Board's authority.

Two members, and one alternate member who did not participate in the vote, indicated that they favored granting the rehearing request, because in their view the ZBA overstepped by voting to allow only a residential use in a commercial zoning district that was adopted by a vote of the Town. A minority of voting members noted that they believed this action to be counter to the letter and spirit of the Zoning Ordinance, including of the Special Commercial District.

If the Select Board feels strongly that the ZBA decision was in error, the Board has the option to appeal the decision. If the Board wishes to pursue this, it should consult with its legal counsel in filing an appeal. It is staff's understanding that the Select Board would have the option to file a potential appeal either in Rockingham County Superior Court or at the State Housing Appeals Board. Legal counsel can advise the Board on which venue might be most preferable. Legal counsel can also advise the Board if it is advisable to hire legal counsel to represent the Zoning Board of Appeals.

If the Select Board wishes to file an appeal, the appeal would need to be filed no later than by May 2, 2024. Because the timeline to file an appeal is relatively tight, the Select Board should discuss whether it wants to authorize counsel to begin preparing an appeal at this time. The Board would not necessarily have to vote to authorizing filing an appeal at this time, however the Board would need to hold a special meeting to take, or not take, such an action sometime before May 2, 2024.

MOTION by Mr. Pierce to approve Case #677 Findings of Fact. Mr. Paine seconded the motion. All voted in favor and the motion passed.

40 41

> 42 43

44

3. New Business:

a. Request for Rehearing. The Zoning Board will determine whether to grant a rehearing,

requested by the Select Board, of the following application on January 9, 2024:

Case #674: Green & Company (Applicant), Boulders Realty Corp. (Owner), 13 & 15 Stoneybrook Lane, Tax Map 4, Lots 1 & 7, Zoned Special Commercial. Request for a variance from Table 3.6, Table of Uses, to permit the development of single-family dwelling units in a district where the use is not permitted. The applicant proposes 59 single-family dwellings on a single property under a condominium form of ownership.

Mr. Pierce stated this is a public meeting and not a public hearing. The Zoning Board of Adjustment (ZBA) will internally discuss and make a determination on the motion for rehearing but will not accept any new public testimony. The Board has received written materials from the applicant for the emotion for rehearing, the Stratham Select Board, as well as comments from the applicant's representatives in the decision being complained of represented by Attorney Kevin Baum. Mr. Pierce noted that the Board received one e-mail from a member of the public that he would like Mr. Connors to address.

Mr. Connors stated the Town received an email today from a member of the public in this matter. He does not recommend the ZBA accept it as public testimony because the town's attorney recommended not to accept any public comments for the ZBA deliberation on the rehearing request. If the rehearing is granted, there will be a new public hearing and the public would have the opportunity to comment but at this stage, it is only a decision on whether to grant the rehearing or not. Mr. Connors' recommendation is for the ZBA not to accept the public comments, though he could provide them if the Board disagreed.

Mr. Pierce replied that he agrees with not accepting the comments and asked the ZBA members if there are any objections to not hearing the email. No members raised any objections.

Mr. Pierce stated that Zoning Board Rules of Procedures do not address whether alternate members can participate in discussions for rehearing requests. Mr. Pierce said the Board should vote on whether or not to allow the alternate members to participate in the deliberations.

MOTION by Mr. Eastwood to allow alternates to have input in the discussion for the rehearing. Mr. Paine seconded the motion. All voted in favor and the motion passed.

Mr. Pierce stated that not all board members at this rehearing discussion were present at the Zoning Board meeting in which the original case was decided on January 9, 2024. He asked those members not present if they had the opportunity to review the application materials, meeting minutes, and associated materials and do you feel comfortable participating in the discussion. Mr. Paine, Mr. Eastwood, and Ms. Cushman all replied yes.

Mr. Pierce said the Board can now engage in the discussion. He asked the ZBA members if anyone sees a reason to or not to grant a rehearing. Mr. Eastwood replied that he appreciates the information about the parcel they received from the Select Board and believes that there are potential areas that the ZBA did not understand or consider and that may be a reason to discuss it further.

Mr. MacMillan stated that according to RSA 677:3, a rehearing is granted only if the petitioner has new relevant evidence to submit; new relevant legal issues that were not considered; or a prejudicial, technical, or legal error in the original decision. He reviewed the response from the Select Board petition, and also from the rebuttal from the applicant and is not sure that the first two standards apply. Mr. MacMillan asked whether the ZBA made a technical error related to one of their findings, which

Page 2 of 10

was that housing is a permitted use and he believes that the ZBA needs to discuss that.

118

119 120 Ms. Cushman stated that she has been in the town a long time and while she was not involved with writing this particular zoning district, she has been involved with many others. Ms. Cushman stated that the decision to allow single family housing is not taken lightly. She believes there was a lot of discussion about having a residential development in that District and the challenges with traffic from elementary and middle school buses at the stoplights and the intersection and that the desire was to not have housing after the bridge. That was a part of the discussion when the zoning was approved. Ms. Cushman added that the impact of 59 houses in an area where single-family homes was voted by the Town to not be allowed seems like an overreach. She added that Green & Company has been around a long time, she has a lot of respect for them as a developer and they have completed a lot of good projects, but she can't believe that this is the only thing that can happen there. Ms. Cushman stated that the area around it is commercial and she imagines that area could look very different in a few years, that Stoney Brook could be part of a larger commercial redevelopment project. Ms. Cushman stated she viewed the area in person and only saw four houses all in Exeter so there is land in Exeter that could be redeveloped. Mr. Federico stated there is also one house in Stratham. Ms. Cushman replied that she didn't see that house and she can envision those properties being redeveloped not as residential. Ms. Cushman continued that one of the things that the ZBA cited was the recommendation from the Regional Planning Commission (RPC) about more housing. She stated that she represents Stratham on the RPC and she serves on the Regional Impact Subcommittee and that the subcommittee did not convene to discuss the project. The comment letter submitted to the ZBA was a staff response to a request. The response did not go into an in-depth study to determine whether this would be a good place for single-family homes. At the ZBA level there is not enough information, like a traffic study. There is a lot of other information that comes forward when a proposal goes to the Planning Board and the project could then go to RPC for a regional impact discussion. Ms. Cushman stated that with the limited information available to the RPC for this project, she thinks that although the RPC supports more housing, she doesn't believe the response states that this location is the ideal spot for 59 houses. She stated that's not her understanding of how they function in response to requests for regional impact.

122123124

125

126127

128 129

130

131

121

Mr. Pierce asked Ms. Cushman if those issues would be presented to the Planning Board to make that decision and does she believe the ZBA is in effect doing the work of the Planning Board. Ms. Cushman replied that she believes that the ZBA is superseding. Ms. Cushman added the ZBA is deciding to do something that town meeting voted not to and if the Planning Board thought that this project was a good idea, that the Planning Board could change the zoning and allow single family homes there. Ms. Cushman stated that the project does not meet the current zoning, it says single family not allowed. She stated that variance applications come to the ZBA because of something that is not allowed. In her opinion, to grant a variance to allow 59 homes where the town said no, seems like an overreach and that maybe it's not the best use of property that is surrounded by commercial and highway.

132133134

135

136

137

138

139

140

141142

Mr. MacMillan disagrees with Ms. Cushman and adds that it's not really the issue that they were discussing. He is looking for new relevant evidence and they heard some of this evidence before. He added that regarding new relevant legal issues and prejudicial, technical, or legal errors and the decision to send the project to the regional board; he feels that the ZBA was somewhat backed into that decision because they were the first land board reviewing the project. He added that he felt the ZBA had to make the determination to send the project to the RPC. Mr. MacMillan stated that he didn't think there was an option to not do that and that he remembers the discussion regarding a regional impact determination, and he thinks was the correct decision. Mr. MacMillan stated that what the RPC did with the request, or what they didn't do with it, he doesn't think is a discussion that is relevant to

what the ZBA is being asked to do tonight. Ms. Cushman replied that she mentioned it because it seemed to her to be the basis of some of the decision making and it is part of the response from the applicant.

145146147

148

149150

151

152

143

144

Mr. MacMillan stated the ZBA needs to determine if they made a legal error in assuming that because the zoning encourages multifamily housing, is that enough for the ZBA to alter that definition based on the variance that the ZBA already decided to grant. That is the only question that he has that might allow a rehearing but he hasn't heard anything that that convinces him. He asked Mr. Connors to opine as the Board had discussions over two meetings and that wasn't an issue raised. Mr. MacMillan continued that he read the rebuttals from the Select Board and the petitioner that is the only thing that he believes might meet one of these three criteria for the rehearing.

153154155

Mr. Connors clarified that he believes the RSA states the Board of Adjustment may grant such rehearing if in its opinion good reason therefor is stated in the motion. He added that he believes the other language in the application is based on caselaw.

156

Mr. Paine stated he was in support of both Mr. Eastwood's and Ms. Cushman's comments with regards an overreach of sorts with regards to the residential use of the land. He continued that his understanding of Stratham's Zoning Regulations is that multi-family housing is an accessory piece that would complement or allow for some housing in a commercial area that could help with either housing of staff or housing for anyone in general. He does not think that multifamily housing is intended to be the focus of the commercial area and that this piece of property is zoned as commercial and is adjacent to the Town of Exeter's zoned commercial land as well. Mr. Paine acknowledged that there are residential properties along the entry to this property, but they are in commercially zoned areas in both Exeter and Stratham. He added that though those homes are currently residential uses, their future use is anticipated to be a commercial use, whether that's a mixed use or not. Mr. Paine said to hang your hat on the existing residential use in the area doesn't necessarily speak to the intended use of the property and what the community wanted. He added that the Town voted for the commercial zoning and for the ZBA to determine that the entire property can be used solely as residential instead of a commercial use with a supplemental residential piece, takes away from the commercial zoning. He added that if the ZBA's intention is to make adjustments, he believes this decision is not an adjustment and is a full alteration to the zone. Mr. Paine provided examples of basic adjustments including enlarging a sign or allowing property to be moved several feet one side or the other of a buffer. Mr. Paine believes the ZBA made a decision to repurpose the land into something that wasn't previously approved and would, more or less, put that property into residential use into perpetuity until someone tears down 59 houses. The comments that were presented by the applicant regarding the expense of water and sewer, he believes also apply to the proposed residential use. Mr. Paine stated that a robust commercial development proposal could have more options to offset the cost of the water and sewer.

180 181 182

183

184

Mr. Pierce stated that he doesn't disagree with Mr. Paine's statement but wonders if that's a new topic because the ZBA discussed water, sewer, and housing at the public hearing and those factors were considered in the ZBA's unanimous decision. Mr. Pierce stated that he does not consider it to be new information to grant a rehearing.

185 186 187

188

189

Mr. Paine replied that the overreach of spot zoning should be considered for the legal component for a rehearing. He stated that the ZBA should consider what their actions have done or what the results of their actions has created and in this case it could be a spot zone that wasn't intended to have the use solely as residential.

190 191 Mr. Federico stated that he was a Selectman when this zone was created in 2009 and when the Town received a commitment from Exeter to obtain water and sewer services. In 2018, the Town voted against the water and sewer extension from Exeter, he said. In 2020, the Town voted against implementing a TIF district, which would have created the opportunity for just a commercial district to obtain water and sewer. Mr. Federico stated he is perplexed with the comment that the ZBA is changing the zoning when we are granting relief to an applicant. The applicant provided the history of the zone and of the property. There was a church proposed in the past that couldn't get enough money to build a large enough parking lot with all of the conditions that are required. He doesn't see how commercial is going to be developed in that area with all of the wetlands. Mr. Paine stated that there is space for 59 residential units. Mr. Federico replied that there isn't a lot of paving. Mr. Pierce added that with residential the use can be weaved in and out of wetlands areas. Mr. Paine replied that the 59 units includes houses, driveways, and septic systems so the majority of the developed areas is filled. Mr. Federico replied those are only conceptual designs for the property and the Planning Board will review the project. Mr. Pierce wondered if the ZBA is acting as the Planning Board by discussing those issues.

Ms. Cushman stated that she is not saying there should never be residential, but since the Town voted that single family house is specifically not allowed. She remembers the Town discussion and that people did not want housing on that side of the bridge nor in the Gateway District and that is why housing in that area is so restrictive, that those areas were going to be the commercial zone and housing would be in the rest of town. Ms. Cushman believes it is illegal for the ZBA to change it and it should be a town vote to decide to change the zoning to allow single-family homes with the trash and school bus issues that would be associated with that use. She believes in the future there could be a major development in the Exeter portion with the houses redeveloped and that the land in Stratham will be an accessory to that. She added there would be water and sewer for the Exeter development and the land in Stratham could be conservation or common area and that to allow single-family housing seems very shortsighted. Mr. Pierce replied that he feels the discussion is getting away from the request for a rehearing and he requested a motion to vote on the rehearing. He added that he believes a lot of the information being discussed tonight was discussed in the two meetings on the project and because all ZBA members did not attend both meetings, the applicant presented the entire project at the second meeting for the benefit of those who did not attend the first ZBA meeting. Mr. Pierces stated that the reason the project was not voted on at the first meeting was because the ZBA voted to have the project reviewed by the Rockingham Planning Commission.

MOTION by Mr. MacMillan that the Zoning Board of Adjustment deny the request for rehearing. Mr. Pierce seconded the motion. Motion passed 3-2 with Mr. MacMillan, Mr. Pierce, and Mr. Federico voting in favor. Mr. Eastwood and Mr. Paine voted against the motion.

b. Case #678: John and Susan Connors (Applicants), Connors Revocable Trust (Owner), 3 Treat Farm Road, Tax Map 14, Lot 163, Zoned Residential/Agricultural. Request for a variance from Section 11.5 Wetlands Conservation District (Overlay), to permit the construction of a shed 28 feet from the edge of wetlands (poorly drained soils) where a minimum setback of 50-feet is required.

Mr. Pierce invited the applicants to present their project. Ms. Connors stated that they are looking to construct a 200 square foot shed approximately 28 feet from the edge of wetlands. She described the rear yard as approximately 17,500 square feet land with only 6,900 square feet as usable due to the wetlands buffer and the 50-foot rear non-disturbance buffer for cluster subdivisions. She described the side property line between 3 and 5 Treat Farm as angling behind 5 Treat Farm. Ms. Connors addressed

the Conservation Commission's question as to why the shed couldn't be placed in an area towards the rear property line and along the side property line for 5 Treat Farm Road. She stated that the issue with that location is it would be in the direct line of sight of their neighbor's patio which is only 65 feet away and that the neighbor at 7 Treat Farm Road has fully developed their backyard with a pool, a large fireplace and a very large pavilion which is in the direct view of 5 Treat Farm Road. Ms. Connors stated that her and her neighbors both like the unobstructed view of their open lawn areas and the Connors family does not want to impede on their recreation space, given the lack of usable land due to the buffers.

 Ms. Connors presented photographs of the yard and proposed shed location and the challenges with sloping land. She explained the proposed location has a few boulders that will be moved, a large dead tree stump and is covered with invasive bittersweet which quickly wraps around trees and kills them. She further described the extent of bittersweet in the buffer zone. Ms. Connors summarized that the variance request it to place the shed in an area where the wetland ordinance allows clearing, but does not allow structures. She noted that this year the Town voted to allow smaller sheds up to 120 squarefeet to be constructed within 15 feet of the wetlands boundary but that smaller size will not fit their needs. She stated that their outdoor equipment is currently stored outside under tarps and they would like to get all it out of the elements, under proper cover, which would be more protective of the environment. Ms. Connors asked if the ZBA has any questions.

Mr. Federico asked what is on Map 14 lot 53. Ms. Connors replied that is the development's open space lot that has wetlands and a stormwater basin. Mr. Federico asked if that stormwater basin drains into the wetlands. Ms. Connors replied no, it is not supposed to.

Mr. Paine asked when it rains what direction the water flows. Ms. Connors replied there is a high point in front of their property that flows to the back of the development where the two additional stormwater basins are located and the rest flows to the front stormwater basin next to their property. Mr. Paine asked if because of that flow, will the shed be on some sort of platform to allow the water to flow underneath it. John Connors replied that they would either construct it on top of a ¾ inch stone base or posts.

Mr. Federico asked if there is water in the wetlands in the summertime. Mr. and Mrs. Connors replied not really. Mr. Pierce added that he has some history with that property before they built Treat Farm and that wetlands were flagged at that time by Sergio Bonilla. Ms. Connors replied that they are going off the flags from the subdivision development and the flags are still there. She added that they also hired Jones and Beech to stake the property lines.

Mr. Pierce asked if there is any wetland vegetation in the proposed shed area. Ms. Connors replied that there is not, just a few boulders. John Connors added that there is not a lot of vegetation other than the bittersweet.

Mr. Eastwood asked what the property line setback for sheds greater than 120 square feet. Mr. Dinsmore replied it is 10 feet for a cluster development.

Mr. MacMillan asked about the question from the Conservation Commission asking why the shed couldn't be placed elsewhere on the property and if there is a grade issue with the location they suggested. Ms. Connors replied the issue is that they only have about 6,000 square feet of usable land and the burden on the neighbor's view of the surrounding land. John Connors added that he wants to put the shed in the most inconspicuous spot as would any homeowner and the location suggested by

the Conservation Commission is the most conspicuous area. He added that they considered the front yard, but because this house is the first house people see when entering the development it would not be well received by the remaining neighbors.

Mr. Paine asked what the reason was for going with a 200 square foot shed and not a smaller one. John Connors replied that he had a 200 square foot shed in Massachusetts and it wasn't big enough. He also had a 450 square foot barn as well. He stated that he has a lot of equipment that is now in the basement, under tarps, in the garage, and spread out around the backside of the property. He added that even though a 120 square foot shed would be easy because a permit is not required, he doesn't want to do it for something that is just not going to be adequate for their needs. Ms. Connors added that they don't want to leave equipment out on the property because the shed is too small and items like wheelbarrows could likely end up being stored in the buffer zone not under cover. John Connors stated that he believes the difference between a 120 square foot shed that doesn't require a building permit and a 200 square foot shed that would be permitted is insignificant.

Mr. MacMillan asked Mark Connors what if a smaller shed is allowed in the area without a permit, what is the scientific or environmental reason that not permit by right a larger one. Mark Connors replied if you have a larger structure that means more runoff from the roof and possible hazards that are being stored in the shed.

Mr. Pierce asked if the shed could be rotated to be more in compliance with the ordinance. Ms. Connors answered they can't because of the grade issue where the shed is proposed, it would have to be built on stilts on one side. John Connors added that the change of grade is about 7 to 8 feet.

Mr. Eastwood asked if the angle is optimized for the contour. John Connors replied yes.

Mr. Pierce asked if the proposed shed is pre-built in only one configuration. John Connors replied no that he will construct a stick built shed. Mr. Pierce asked if the width could be adjusted to move the closest corner of the shed farther from the wetlands. John Connors replied that an eight foot span has less span to deal with on the footings.

Mr. Paine asked where the septic was located. Ms. Connors replied that it is in the front yard and the well is located in the back part of the property.

Mr. Eastwood summarized that basically the variance request is for 80 square feet and that a 120 square foot building is permitted even closer to the wetlands. Ms. Connors agreed.

Mr. Pierce asked Mark Connors if property owners are allowed to have two sheds on a property. Mark Connors replied yes as long as they meet the setback. Mr. Pierce asked if the ZBA should include a condition that there couldn't be another shed constructed in the buffer zone because they could conceivably construct a smaller shed up to 120 square feet without a permit. Mr. Dinsmore agreed that could be allowed without a condition. John Connors agreed and added that we could post that condition in the shed for future owners.

Ms. Connors added that the Conservation Commission had asked about mitigation and their reply was removing an invasive species that is destroying the wetlands. The Commission also had concerns about the storage of gasoline and chemicals to which we responded that those items could be stored in a bin. The Commission replied that although we might be diligent about storage, future owners might not be. Ms. Connors suggested posting the condition of approval inside the building.

Ms. Cushman asked if the variance that is granted is recorded with the property. Mark Connors replied it is not recorded but it runs with the land for future owners. He added that there will be a Notice of Decision signed by the Chair of the ZBA but it is typically not recorded. Ms. Cushman stated that in her experience researching titles, she often found a zoning variance recorded and she suggested that as a condition for this case.

Mr. MacMillan asked if regardless of recording, is the enforcement mechanism a complaint to the code enforcement office. Ms. Cushman replied yes, but the recording makes it part of the official record for future owners.

Mr. Eastwood asked to clarify that two sheds, under 120 square feet, could be placed on one property side by side within the buffer zone. Mark Conners replied no, just one shed up to 120 square feet is permissible in the buffer zone. Mr. Dinsmore added that the Zoning Ordinance also has building coverage requirements of up to 20% per lot.

Ms. Connors mentioned that she will go through the steps of the criteria for the approval of the variance.

Criteria a. the variance is not contrary to the public interest.

Ms. Connors stated that the shed will help to improve the aesthetics of the neighborhood by removing their current tarps and sheds are very common residential use. She stated that they will construct the shed with minimal earth disturbance. Sheds are not contrary to basic zoning objectives and it won't alter the central character, the neighborhood, nor will it threaten public health, safety, or welfare. The shed location is far from all abutting residences as possible and NHDES does not prohibit construction in a wetlands buffer zone.

Criteria b. The spirit of the ordinance is observed.

Ms. Connors stated that the 25 foot no disturbance area will be left intact and the removal of invasive bittersweet vine that is spreading into the wetlands will benefit the health of the wetlands. The shed will not alter the essential character of the neighborhood and will not threaten public health, safety or welfare and the design will be consistent with the character of the existing home and the rest of the neighborhood.

Criteria c. Substantial justice is done.

Ms. Connors stated that granting the variance will not cause harm to the general public and imposes no demand on municipal services and denial of the request would result in a loss for us as it will provide necessary storage of yard equipment. The smaller alternative won't fit their needs and they would still probably be left leaving some items uncovered in the yard. Locating the shed in the middle of the yard is undesirable to them and she believes to any homeowner, as it would cause a loss of open space for recreation and would be aesthetically undesirable to their neighbors and them.

Criteria d. Values surrounding properties.

Ms. Connors stated that the shed will not diminish property values because sheds are common residential uses in Stratham and will actually improve the value of our property and benefit

comparable homes. The location is as far from 5 Treat Farm as possible and she believes the alternative location could possibly diminish the neighbor's property value because of the view obstruction.

Criteria e. Literal enforcement would be a hardship.

Ms. Connors stated that of the 17,000 square feet of rear yard only 6,900 square feet of it is usable, which is about 39%. The rear yard is burdened by a 50-foot setback non-disturbance setback for cluster subdivisions. She noted that during this process, they realized the developer cleared more than he was supposed to. In addition to the cluster subdivision buffer, the property is also burdened by the 50 foot wetlands buffer.

Ms. Connors added that in addition to the variance criteria, the proposed use is reasonable because it provides necessary storage for lawn equipment for residential use. Regarding unnecessary hardship, their parcel is one of the most significantly burdened by the wetlands buffer in the neighborhood. She asked if the ZBA has any questions on the criteria.

Mr. Pierce opened the meeting to the public. No one from the public spoke.

Ms. Connors mentioned the comments submitted by email from the neighbor at 5 Treat Farm Road. Mr. Pierce acknowledged the comments submitted in support of the variance request.

MOTION by Mr. MacMillan to close the public hearing and to move to deliberations. Mr. Paine seconded that motion. All are in favor and motion passes.

 Mr. Pierce asked the ZBA to discuss conditions of approval including recording the decision and requiring the storage of hazardous waste in safe approved secondary containers that are used to prevent possible environmental damage. Mr. Eastwood added that there should not be any other structure constructed in the wetlands buffer setback. Mr. Pierce added that that the property owner shall ensure construction of the structure poses minimal disturbance to the wetland buffer during construction. All are in favor of all conditions.

Mr. Peirce asked if there were any other conditions that need to be added before they make a motion to move to approve conditions. Mr. MacMillian added if the construction does not take place within two years of the acceptance of the variance then this variance would become null and void. All agreed.

Mark Connors recommended that the recording cost be paid by the applicant.

 MOTION by Mr. Paine that the Zoning Board approve the variance application submitted by Susan and John Connors from Section 11.5.3, Wetlands Conservation District, of the Zoning Ordinance to allow the construction of a shed within 50 feet of an existing wetland where no building activity is permitted as the Zoning Board has determined the application meets all of the variance criteria for the Board's deliberations, subject to the following conditions as noted by the chair.

1. The variance, if not exercised, will expire two years from the date of the hearing on April 2, 2024.

2. Hazardous materials must be stored in a safe, approved secondary container that is used to prevent possible environmental damage.

- 3. No other secondary structures shall be built in the wetlands.
- 438 4. The decision letter be recorded with the Rockingham County Registry of Deeds.
 - 5. Installation of the structure poses minimal disturbance to the wetlands buffer during construction.
 - All voted in favor. Motion passes.

441 442

444

439

440

- 443 **4. Adjournment**
 - Mr. Pierce stated that the meeting adjourned at 8:14 p.m.

TOWN OF STRATHAM

Voice (603) 772-7391 • Fax (603) 775-0517

MEMORANDUM

TO: Christiane McAllister, Finance Administrator

FROM: David Moore, Town Administrator

DATE: April 1, 2024

RE: Approval and Procedure for Heritage Commission Historic Home Plaques

At its regular meeting on March 18th, the Select Board approved the Heritage Commission's request to support future expenditures from the Heritage Preservation Capital Reserve Fund for a Historic Home Plaque program. This memo is intended to memorialize that approval and the Broad program parameters as well as the plan for accounting for the funding involved and a procedure for the work. I met with Nate Merrill and Christiane McAllister separately to outline the procedural follow-up resulting in this memo.

<u>Program Description</u>: The Heritage Commission is sponsoring a historic home plaque program. It is going to offer historic plaques marking homes that are included in the Town-wide Inventory of Historic Property. This project is in partnership with the Stratham Historical Society and the individual homeowners themselves. The Heritage Commission (Town), Historical Society and the homeowners will divide evenly the cost of each plaque in order to incentivize participation.

<u>Roles</u>: The Heritage Commission will be the program sponsor and run the programmatic aspects of the program and interactions with homeowners, vendor, and its partner, the Stratham Historic Society. The Town of Stratham (through its Finance Office) will serve as the fiscal agent. Nate Merrill is the program manager for the Commission on this project. Karen Richard will be the point person for the Finance Office and work in close coordination with Christiane McAllister.

<u>How it will work</u>: The Heritage Commission will maintain the list of participating property owners. The Heritage Commission PM (Nate) will place the orders. The Commission intends to "batch" orders so that multiple plaques are ordered at a single time.

Payments from individual homeowners will be mailed to the Town of Stratham Heritage Commission c/o Karen Richard. They will be logged by Karen, deposited with the Finance Office and Nate Merrill will be advised.

<u>Accounting:</u> Here is a description of how the accounting will work as recommended by the Finance Office and represents the most direct (easiest) process available given the use of the Preservation CRF and compliance with generally accepted accounting principles.

- 1. Orders placed by Heritage Commission with list of property owners provided to Finance Office.
- 2. Vendor will invoice the Town.
- 3. Finance will pay the vendor from the Heritage Commission Operating Budget
- 4. Finance will request reimbursement from Historical Society for 1/3 of the actual invoice.
- 5. Finance will post payment of Historical Society reimbursement to Heritage Commission Operating Budget expense line
- 6. Plaques will be distributed to property owner upon payment of 1/3 cost
- 7. Property owner payment will be posted to Heritage Commission operating budget expense line
- 8. Finance will request reimbursement from Heritage Preservation Fund (ToTF) for 1/3 cost to offset net in Heritage Commission operating Budget expense line.

Plaque delivery and handover and all logistics related to tracking will be coordinated between Karen on behalf of the owner and Nate Merrill.

Mark Connors, Planning & Community Development Director

FOR: April 15, 2024

RE: HB 1279 and HB 1400

There are several bills pending in the State Legislature this session related to housing and how municipalities regulate housing and particularly land use/zoning issues associated with housing. HB 1279 and HB 1400 were recently passed by the NH House and will soon be considered by the State Senate. The draft legislation is included for your review, though brief summaries are also included below:

- **HB 1279:** Would significantly limit how municipalities can regulate accessory dwelling units (ADUs), including requiring that municipalities allow up to two ADUs per single-family property. One ADU would have to be permitted by right and one ADU would have to be detached. Municipalities could not require the first ADU to be any smaller than 1,000 square-feet and the second to be any smaller than 850 square-feet. Municipalities would have to allow for parking requirements for ADUs to be met through the use of "legally dedicated off-site locations."
- **HB 1400:** Restricts municipalities from requiring more than one parking space per residential unit.

At its April 3, 2024 meeting, the Planning Board voted to recommend that the Select Board register formal objections to both bills with the State Senate. The Planning Board discussed several concerns with the bills, though most concerns centered on the fact that these bills were too expansive and placed unreasonable mandates on municipalities and that the state would be essentially handcuffing municipalities in the ability to reasonably regulate these matters. A copy of the draft Planning Board minutes related to this discussion is included for your review.

Certainly housing availability and affordability are a major concern of the Planning Board, and there may be some zoning amendments proposed next year in response to these concerns, however the Board feels strongly that solutions to these issues are best brokered on the local level by land use boards and through active engagement with the community.

Draft letters have been completed and are included for the Select Board's review.

April 16, 2024

The Honorable Debra Alschiller New Hampshire State Senate 33 State Street Concord, NH 03301

RE: House Bill 1279

Dear Senator Altschiller,

We are writing to express our concerns regarding House Bill 1279, which will be considered by the Committee on April 9, 2024. This legislation, if enacted, would significantly overhaul accessory dwelling unit (ADU) requirements currently stipulated under state law by requiring municipalities to allow two ADUs per property, requiring provisions for detached ADUs, increasing the minimum size of ADUs, and limiting the ability of municipalities to set minimum lot sizes for residential properties with ADUs to any more than one half acre, among several other changes.

We would note at the outset that Stratham recognizes the potential for ADUs to fulfill some of our housing needs and Stratham shares the concerns of so many regarding the high and escalating cost of housing in our community and across the region. In fact, Stratham has tailored its ADU requirements to be significantly more flexible than what is currently required under state law to remove barriers to entry and implementation for property owners. The Town allows for both attached and detached ADUs, allows ADUs by right, and permits ADUs to be up to 1,000 square-feet, all provisions that are more generous than what is required. Dozens of residents have taken advantage of these opportunities and constructed ADUs on their properties.

If HB 1279 proposed more limited alterations to ADU requirements, the Town may not object. However, as currently presented, the legislation presents many concerns for the expansive manner in which it would handcuff municipalities. Simply stated, this legislation removes the ability of municipalities to reasonably regulate ADUs and makes this a function of state government. For example, the Town would not be able to restrict detached ADUs from front yards or to set reasonable limits on minimum lot sizes for parcels with ADUs beyond one-half acre. In a community without a municipal water supply that is almost entirely dependent on private wells and one with significant existing source and surface water contamination issues, this presents a host of environmental concerns. We would posit that placing three housing units on a single half-acre parcel is not a responsible use of land in many more sensitive areas and may present a host of unintended consequences associated with impacts to the environment and drinking water sources, among others.

In summary, while we share your concerns regarding the cost and availability of housing in our state, we do not believe HB 1279 is an appropriate vehicle for reform. The legislation unfairly restricts municipalities from responsibly regulating ADUs and places untenable and poorly conceived one-size-fits-all mandates on communities. For these reasons, we would ask that you vote not to advance HB 1279.

Thank you for your consideration.

Respectfully,

Michael Houghton Chair, Stratham Select Board On behalf of the Stratham Select Board

April 16, 2024

The Honorable Debra Altschiller New Hampshire State Senate 33 State Street Concord, NH 03301

RE: House Bill 1400

Dear Senator Altschiller,

We are writing to express our concerns regarding House Bill 1400, which will be considered by the Committee on April 9, 2024. Our understanding of this legislation is that, if enacted, it would restrict municipalities from requiring any more than one parking space per residential unit regardless of the size of a dwelling unit. Our concerns with HB 1400 are myriad, including that it does not account for the size of a residential unit - while one parking space might be appropriate for a studio apartment, it is surely not sufficient for a four-bedroom home – but our chief concern is that this one-size-fits-all answer to a complex issue represents an inappropriate exercise of a legislative statewide mandate.

As you are aware, parking demands are highly dependent on local conditions and the ease of accessing alternative transport modes. Here in Statham, like so many other communities across New Hampshire, there are simply not reasonable alternatives to car travel and automobile access represents a lifeline for residents.

We recognize that the provision of parking represents an added cost which contributes, although modestly, to the expense of housing construction. We also share your concerns regarding rising housing costs and a lack of inventory, however we believe land use solutions to this issue are best brokered at the local level by Planning Boards and through active engagement with residents, builders, and others. As such, we would strongly urge you not to advance House Bill 1400.

Thank you for your consideration.

Respectfully,

Michael Houghton Chair, Stratham Select Board On behalf of the Stratham Select Board

a. Other Business:

1. Legislative Updates and Discussion

Mr. Connors provided an update on some pending legislative bills. He stated that two bills were passed by the House of Representatives last week. Mr. Connors suggested that if the Board has a strong feeling regarding any of the bills, the process would be for the Board to write a letter to the Select Board and ask that the Select Board formally comment on the bills on the Town's behalf.

Mr. Connors stated that HB 1291 passed 220 to 143 and affects Accessory Dwelling Units (ADUs). He provided the following points on the proposed law.

Would require municipalities to permit a minimum of two ADUs per single-family lot with no additional requirements on dimensional requirements (including minimum lot size, frontage, setbacks, etc.) beyond what is required for single-family housing. At least one of the ADUs would have to be detached. Current law only requires municipalities to allow one ADU per lot.

• Would require at least one of the ADUs to be permitted by right. The second ADU could be subject to approval of a Special Exception by the ZBA or a Conditional Use Permit by the Planning Board.

• Requires ADUs have a means of ingress or egress either independently or through a shared common space, but limits the municipality's ability to regulate which option is acceptable.

 • Allows applicant to meet municipal minimum parking requirement by providing parking at "legally dedicated off-site location."

 • Provides the municipality the ability to regulate the size of ADUs provided that one ADU is not less than 1,000 square-feet and the second ADU is not less than 850 square-feet (current law limits municipalities from requiring ADUs be smaller than 750 square-feet).

 • Would allow municipalities to require that the second ADU on a property shall meet requirements prescribed under state law to be classified as workforce housing.

Limits the ability of a municipality to set a minimum lot-size for ADUs beyond one half acre.

Mr. Connors stated this is one of about a dozen housing bills before the Legislature. He added there are a lot of similar bills across the country that are in response to rising housing costs and there is a focus on cracking down on local regulations and how they affect housing. Mr. Connors stated he believes there is not a lot of housing that the Planning Board has denied and there are a

lot of market factors that factor into how much housing is produced. Mr. Connors opened it up for

 Board discussion.

Mr. Kunowski asked if there would be a natural restriction on ADUs because of septic and well requirements. Mr. Connors replied that they would still need to meet State requirements for well and septic. Mr. Kunowski asked if that would take priority over, for example, the half-acre lot minimum. Mr. Connors replied yes, but a good quality half acre lot might be able to meet the requirements. Mr. Canada asked if the Building Inspector reviews the permit for the septic system

Mr. Allison stated that he understands this is an attempt to solve a housing problem, but the cost of building materials has increased, in addition to the cost of land, and he is not sure that this bill will solve the problem. That housing will still be expensive.

Mr. Zaremba asked what the current requirements for an ADU are, generally speaking. For example, does an owner need to live there? Mr. Connors replied yes, that the owner of the property

when an application for an additional bedroom is submitted. Mr. Connors replied yes.

must reside on the property. Mr. Canada stated that it is difficult to enforce because the owner could move out. Mr. Connors agreed.

Mr. Kunowski asked if ADUs are approved by the Planning Board or if they are allowed by right. Mr. Connors replied they are allowed by right if they meet the requirements.

Mr. Canada asked if there are any in Stratham. Mr. Connors replied, yes, there are quite a few and that Stratham is flexible with the current requirements allowing both detached and attached ADUs and up to 1,000 square feet.

Mr. Kunowski stated that the first and the last bullets in the description seem to conflict in that the first bullet mentions a single-family lot where Stratham's minimum size is two acres. The last bullet mentions an ADU allowable on one-half acre. He noted that a single-family home can't be constructed on a half-acre lot unless it is a cluster subdivision that met other requirements. Mr. Connors replied yes but that the bill states "a municipality may require a property have a minimum lot size of up to one-half acre in order to have more than one accessory dwelling unit". Mr. Allison stated he believes that is referring to another bill that was going to restrict the number of large lots to no more than 50% of the available land. Mr. Connors replied that is one bill that has not yet advanced but agrees it is the same theme.

Mr. House asked if the 1,000 square foot maximum is just the footprint. Mr. Connors replied it is the interior square footage and it includes deck and porehes. Mr. House asked how that affects a two-story building. Mr. Connors replied Stratham's ordinance states a maximum of 1,000 square feet of habitable space. Mr. House asked if the bill states a total square footage allowed. Mr. Connors read "a municipality may establish minimum and maximum sizes for an accessory dwelling unit provided that size may not be restricted to less than 1,000 square feet." Mr. House stated that then it can be larger than 1,000 square feet. Mr. Connors replied that the Town can adopt a minimum and maximum size but the minimum cannot be less than 1,000 square feet. Mr. Allison replied that he thinks it refers to all interior space. Mr. House wonders if it refers to one floor. Mr. Connors replied that it does not specify, but he interprets it to mean the total interior square footage. Mr. House suggests commenting that the maximum square footage be better defined as total interior space to account for multiple floors. The Board agreed.

Mr. House asked the Board if they agree with the comments proposed by Mr. Connors in his staff memo. Mr. Connors added that if the Board really dislikes the bill, they could request that the Senate not approve it and if the Board thinks it can be reworked, they can request amendments to the bill. Mr. Kunowski stated that he is not opposed to the bill, but he is concerned with the lot size and Mr. Connors addressed that in his proposed comments. Mr. Kunowski noted that he is not opposed to the location in the front yard if there are aesthetic standards to meet. Mr. Zaremba is not opposed to it, but it could be improved. Mr. Kunowski stated that he believes the bill would work for properties with town water and town sewer but in Stratham we need to be able to control lot size. Mr. Allison agrees that a half acre lot is small for two houses. Mr. House stated that the Legislature is trying to represent different sized municipalities and Stratham's comments should focus on the challenges of being a small town with private water and septic. Mr. Canada thinks the Town should ask the Senate to defeat the bill. He added that it is a slippery slope headed towards State zoning and it effectively throws Stratham's Zoning out the window. Mr. Houghton agrees with Mr. Canada. Mr. House asked if Mr. Connors knows why this bill was created. Mr. Connors heard it is in response to the housing shortage. Mr. House stated that he doesn't want to change Stratham's ordinance.

the Town
many bill

Mr. Zaremba asked why the Town waits until after the House vote to comment. He understands the Town has limited resources. Mr. Connors replied that is true and additionally that there are many bills on this subject and he worries that if one town sends too many letters, that they won't be taken as seriously.

 Mr. Canada is concerned that there is no reference to mobile homes or manufactured housing. That someone could use one of those as an ADU, which is not desirable in Stratham. Mr. Allison asked if our current zoning for mobile homes would prevail. Mr. Connors replied that the current ordinance states the ADU must be consistent with the character of the home and he does not see anything in the bill that will prevent that. Mr. Canada is concerned that the state law will trump that.

Mr. Connors suggested that the Board phrase the letter such that the Town opposes the bill but request the amendments in case it passes.

Mr. Allison suggested a comment that the bill be dependent on the availability of public sewer and water. The Board discussed the suggestion and generally agreed although they believe the lack of public utilities will limit ADUs in Stratham anyway.

Mr. Zaremba stated that he thinks the Town should choose one way to go with the letter. He believes that saying we don't like the bill but here are comments is not effective. Mr. Canada agreed.

Mr. Allison stated that when a municipality has water and sewer they want more customers for revenue therefore it makes sense in those communities, but not in Stratham.

Mr. Canada asked if the municipal group is fighting it. Mr. Connors replied yes but there is also support for the bills. Mr. Houghton stated that the bill was not sponsored by a Seacoast town and that if we polled the towns in the Seacoast he presumes there is very little support.

Mr. Allison agrees with taking the position that Stratham is against the bill. Mr. House polled the rest of the Board and all agreed with commenting against the bill. Mr. House asked if we would give reasons why the Town disagrees with the bill. Mr. Canada and Mr. Connors replied yes. Mr. Connors added that part of the argument is that Stratham has very reasonable regulations on ADUs and that the Town encourages them.

Mr. Canada made a motion that the Planning Board request that the Select Board write a letter to the State Senate recommending killing this bill. Mr. Zaremba seconded the motion. All voted in favor and the motion passed.

Mr. Connors introduced another bill that has passed the House of Representatives. HB 1400 states "In its exercise of the powers granted under this subdivision, the local legislative body of a city, town, or county in which there are located unincorporated towns or unorganized places may regulate accessory parking for vehicles, but shall not set the maximum residential parking spaces, per unit, to greater than one parking space per residential unit." Mr. Connors stated that, for example, a four-bedroom unit, in reality, would need more than one parking space. He added that it would make more sense if it was tied to the number of bedrooms. The Board agreed that one space per unit does not seem adequate and that the alternative of off-street parking is not desirable. Mr. Kunowski asked what Stratham requires today. Mr. Connors replied that it is certainly not one

space and he thinks it is tied to bedrooms. Mr. Allison stated there are organizations like American Association for State Highway Officials with guidelines for parking and he is surprised at this bill.

Mr. House stated that he agrees with Mr. Connors suggestion of requesting an amendment to say one space per bedroom. Mr. Canada countered that suggestion does not take into account children who don't drive and suggested that the Town submit comments in opposition to the bill. Mr. Houghton doesn't agree with one per bedroom and provided the example of a one-bedroom unit with a couple where both have a car. Mr. Zaremba commented that there is no municipal parking in Stratham so that isn't an option.

Mr. House polled the Board and all agreed with commenting against the bill.

Mr. Zaremba made a motion that the Planning Board ask the Select Board to write a letter to kill House Bill 1400. Mr. Canada seconded the motion. All voted in favor and the motion passed.

Mr. House asked if there is a deadline for the Planning Board's request. Mr. Connors replied that the next Select Board meeting is April 15th

b. Miscellaneous Community Planning Issues

Mr. Connors announced that the Zoning Board denied the request for the rehearing of the Stoneybrook Project and the Select Board has 30 days to appeal the decision if they decide to. Mr. Connors stated the Board can have a brief discussion about it but he cautioned that the Planning Board should not get very involved at this stage as the Select Board is very engaged in the matter. There were no comments from the Board.

Mr. Connors stated that the Chase Bank construction has begun. He added that this is the hardest time for parking since the new additional parking is not yet constructed and the construction area will take up parking. Mr. Zaremba asked if the Citizens Bank ATM will be removed because he saw it boarded up. Mr. Connors said he would look into it.

5. Adjournment

Mr. Canada made a motion to adjourn the meeting at 7:45 pm. Mr. Zaremba seconded the motion. All voted in favor and the motion passed.

Subject: Transportation Projects and Priorities - Call for Projects (Deadline June 5, 2024)

Dear City/Town Managers/Administrators:

Please forward this to the appropriate officials and departments within your community.

The Rockingham Planning Commission, as the designated Metropolitan Planning Organization (MPO) for the region, is responsible for maintaining the transportation planning process including identifying and addressing transportation service and infrastructure needs. In New Hampshire, this process is embodied in three planning documents; the MPO Long Range Transportation Plan (LRTP) which establishes regional transportation goals and project priorities to meet these goals over the next 20 or more years; the State Ten Year Plan (TYP) which is the statewide queue for project implementation; and the MPO Transportation Improvement Program (TIP) which is the short-range (4 year) list of federally funded projects currently in design, engineering, and construction. The attached information provides additional details on this process and how decisions regarding regional project priorities are made.

RPC is currently evaluating the projects included in the LRTP and establishing regional priorities for the next iteration of the State Ten Year Plan. This is an opportunity for direct community involvement to ensure that local transportation issues and needs are identified. In that regard, community assistance is requested to:

- 1. Identify transportation issues and needs that are important to your community.
- 2. Review the LRTP projects in your community and provide updated information, if available.
- 3. Submit new transportation project proposals for consideration.
- 4. Establish the relative priority of each project to your community. If the community is no longer interested in a project, please provide that information as well.

To support this process and provide an easy method of reviewing and submitting projects, RPC has established a <u>Transportation Project Portal</u> that includes modules for submitting new proposals as well as updating information on existing projects. Instructions for utilizing the portal linked below as well as on the web page. It is suggested that each community select one person to input/update the project data to avoid duplication. The portal, along with further information regarding the project solicitation and selection process, can be accessed via the RPC website at the url below:

www.therpc.org/projectselection

Projects can be added and updated via the portal at any time however, those entered and/or updated by *June 5*, *2024* will be added to the pool from which RPC will select regional priorities for the State Ten Year Plan to meet NHDOT deadlines. The full process timeline is in the table below and an overview of the selection process is attached. Additional resources that may be of assistance are available on the RPC website and are linked below:

- RPC 2045 Long Range Transportation Plan Project List (As adopted 2/2023)
- <u>State Ten Year Plan</u> (Current approved is the 2023-2032 Ten Year Plan and the current draft 2025-2034 Ten Year Plan is anticipated to be approved by the legislature and signed by the Governor in summer 2024)
- RPC Region Projects in the 2023-2026 Transportation Improvement Program (As of 4/02/2024)
- <u>Current Project Selection Criteria (Statewide)</u> These are currently draft criteria and will be finalized in late April or early May, 2024

We fully recognize that this is not a lot of time to pull together a project and RPC staff will be available for meetings (virtual or in person) in April and May to discuss the process and potential projects with interested stakeholders. For long range planning purposes, information on transportation issues, concerns, and projects is important to RPC and will be welcomed even if a fully-formed project is not yet defined. Given the important role of the legislature in the Ten Year Plan process, it is also recommended that you make your local legislators aware of the transportation needs and priorities of your community.

Please contact Dave Walker (778-0885 or <u>dwalker@therpc.org</u>) if you have any questions about the information in this letter or need assistance with additional project information and submittals.

Thank You.

Dave Walker

Transportation Planning and Project Selection Process

A blend of state and federal processes provide the transportation planning structure for New Hampshire. Metropolitan Planning Organizations (MPOs) must adopt project specific Long Range Transportation Plans (LRTPs) and short-range Transportation Improvement Programs (TIPs) as required by Federal regulations. The MPO also has a legislatively mandated role in establishing priority projects for the State Ten Year Plan, which weaves between the TIP and LRTP processes. These three documents provide the path for projects to move from idea (LRTP), through project development and planning (State Ten Year Plan), to implementation (TIP).

Long Range Transportation Plan (LRTP) [20+ year Horizon]

The Long Range Transportation Plan (LRTP) establishes goals, objectives and anticipated future conditions for surface transportation in the MPO region over twenty or more years. Transportation improvement needs are identified and prioritized for implementation. The highest priority projects are recommended to be included in the State Ten Year Plan (as per NH RSA 240:3). The LRTP is fully updated every four to five years and is available on the RPC website at thermology.transportation per NH RSA 240:3).

State Ten Year Plan [10 Year Horizon]

The State Ten Year Plan is the list of funded transportation projects developed by NHDOT and Regional Planning Commissions (RPCs) as recommended by the Governor's Advisory Council on Intermodal Transportation (GACIT). The 9 RPCs provide NHDOT with priorities projects from their LRTPs, and NHDOT supplies identified operational, maintenance, and improvement needs to form the program of projects. The Ten Year Plan is updated on a two-year cycle and must be approved by the Legislature and the Governor prior to being enacted into law. Projects listed in the first four years of the Ten Year Plan that utilize federal funding become the basis of the TIP and State TIP (STIP).

Transportation Improvement Program (TIP) [4 Year Horizon]

The Transportation Improvement Program (TIP) is a four-year, short-range program of regional transportation projects scheduled for implementation in the region using federal funds. It is prepared by the MPO in cooperation with local governments, regional transit agencies, and the New Hampshire Department of Transportation (NHDOT). The TIP is the enactment of the LRTP vision, goals, and objectives, and the implementation of projects contained in the first four years of the State Ten Year Plan. The MPO TIP is available on the RPC website at therpc.org/TIP.

RPC Project Selection Process

The project selection process to establish priorities for the State Ten Year Plan is guided by a set of statewide project selection criteria and guidance from NHDOT. Each Planning Commission customizes the process within that guidance to suit regional needs and priorities. The RPC process begins with a request for project proposals from communities and regional planning partners in the summer of even numbered years and concludes with submitting priority projects to NHDOT in the Spring of odd numbered years. The graphics on the reverse of this handout provide an overview of that process. Full details are available on the RPC website at therpc.org/LRTP.

MPO Long Range Transportation Plan (LRTP)

- State Ten Year Plan
- MPO Transportation Improvement Program (TIP)
 - 4 Year Short-Range Project List
 - Near-term implementation
 - Federally funded or Regionally Significant projects
 - Fiscally constrained
 - Regional TIPs combine to form State TIP (STIP)
 - Updated every two years at conclusion of Ten Year Plan process

10 Year Statewide Queue of Projects

- State Commitment to build listed projects
- Fiscally constrained
- Regions provided funding targets
- New projects added to outer years & move to TIP when they reach year 4
- Updated every two years
- Federal and State funded projects

20+ Year Identified Project Needs

- Regional Policies and Goals
- Federally funded and Regionally Significant projects
- Short and long-term recommendations
- Fiscally constrained
- Projects prioritized for State Ten Year Plan
- Major updates every 4-5 years

RPC Project Solicitation and Selection Process

In the Spring of even numbered years the MPO solicits surface transportation projects from communities and agencies as possible additions to the Long Range Transportation Plan (LRTP). These new needs are combined with those already in the LRTP to form the project list that is the starting point for determining regional priorities for the State Ten Year Plan.

The Statewide Project Evaluation Criteria are given weights and the RPC utilizes these weights in Summer of even numbered years to score each remaining project against the criteria and establish relative priority. The current criteria assess project needs and impacts regarding:

- Economic Development & Goods Movement
- Equity, Accessibility, and Environmental Justice
- Mobility & Congestion
- Natural Hazards Resiliency
- Transportation Network Significance
- Safety for all users
- Infrastructure State of Repair
- Local and Regional Support

Fall of even numbered years, the TAC reviews the scope and cost estimates & recommends, and the RPC Commissioners select, a sub-set of the short-listed projects as the RPC Candidate Projects for the Ten Year Plan. This list is financially constrained to the regional budget target (\$8.1 million) plus two additional projects, and information is assembled for each project to support the NHDOT review.

In spring of odd numbered years, the RPC utilizes the feedback from NHDOT to constrain regional priorities to the budget target. NHDOT includes RPC final project recommendations in the draft Ten Year Plan to start the State approval process.

Project Solicitation

Project Evaluation

Project Selection Criteria In the Summer of even numbered years all projects are assessed for eligibility for federal funding, general feasibility and are classified into one of three categories based on the scale of benefits (local, regional, interregional). Projects that are eligible for federal funding, generally feasible, have a defined scope and cost estimate move to step 3 while those that do not meet those basic thresholds are set aside for future consideration.

Local Safety, a

Safety, accessibility, and multi-modal connections within communities.

Regional

Multi-modal connections <u>between</u> communities & regional activity centers

Inter-Regional Mobility & intermodal improvements to ensure that the region is well connected to the rest of New Hampshire and the northeast.

Project
Short List

Ten Year Candidate Projects

Scope and Cost Review

Ten Year Plan Priorities Based on the scoring assessed in Step 3, the five top projects from each of the three categories are compiled by staff into a "short-list" that is presented to the Transportation Advisory Committee (TAC) for review and consideration mid-Summer of even numbered years. The TAC selects a subset of projects from the short-list for development of scope and cost estimates by RPC consulting engineers.

During the Winter of odd numbered years NHDOT reviews the RPC Candidate Projects and provides recommendations for revised cost estimates. The NHDOT review also addresses any design, scope, or other issues noted.

Go to therpc.org/transportation for more details.

Subject: 2024 Community Power Coalition of New Hampshire's Annual Membership Meeting Notice

Good afternoon, CPCNH Primary & Alternate Member Representatives, Principal Executive Officers (PEOs) of CPCNH Members, & Partners,

The 2024 Community Power Coalition of New Hampshire's Annual Membership Meeting is scheduled for April 25, 2024. Please find the link to the hybrid meeting information below:

https://app.onboardmeetings.com/5c9cead79d684d7f820e391a26955f65-1551/meetingDetail/7a9464d4eba84409b327488962a0cf39-1551

The April CPCNH Board of Directors Meeting will be held the same day following the Annual Membership Meeting and lunch and as close to 12:30p.m. as possible. Please find the link to the hybrid meeting information below: https://public.onboardmeetings.com/Meeting/vYUuabApLpjlwPC6A5tYdFyHs4hIdaJFSlxfURAecuAA/w4UdVJcEr7dSupkviCpY5Kj3FS6ToU5ukXf0Imp5k3MA

PEOs are welcome to join us at any CPCNH meeting, as they are all public meetings. PEO attendance is not a requirement as the Primary and/or Alternate Member Representative(s) attend these meetings on behalf of your community. PEOs that would like to attend either of these two meetings, please let me know so I can send along the Eventbrite invitation. This is how you will RSVP to attend as we need to make sure we include you in the count of participants at our meeting. Primary and Alternate Member Representatives have already received the Eventbrite invitation to RSVP.

I can be reached via email at bobbi-jo.michael@communitypowernh.gov or via phone at (603)568-0265.

Bobbi-Jo Michael | Director of Administration Community Power Coalition of New Hampshire PO Box 840, Concord, NH 03302 (603)568-0265 | bobbi-jo.michael@communitypowernh.gov

Completing a Conservation Puzzle in Stratham

The ingredients to a successful conservation project are opportunity, resources, and partnership. The Ross project in Stratham had been simmering on the burner for 20 years, with the Stratham Conservation Commission having long eyed this 17-acre property as a small-but-mighty piece of land important to the Commission's conservation vision. And, finally, all three elements have come together to produce a major win for everyone involved.

"I think this a huge thing for Stratham," said Dana Ross, who represents the family trust that owns the land and grew up on the family's dairy farm that has been located close to the tract. "It's a success for us and for the town."

Why was this modest-sized parcel so coveted? Simple: the Ross property represents a conservation connection point for multiple protected lands in town including Stratham Hill Park and Gordon Barker Town Forest.

The Ross tract will help protect the water supply for Stratham Memorial School, which operates the largest public water system in Stratham. In fact, this parcel is the largest remaining undeveloped, privately held property within its wellhead protection area.

With its close proximity to the Stratham Memorial School, the acquisition will also provide more town-owned real estate to host academic and recreation activities – something teachers and students have been able to use over the years. From erosion studies to nature-based physical education adventures, the property has been well-loved, and now it will be part of the town's land portfolio going forward.

"This addition will create one of the town's hard contiguous pieces of conserved land," said Mark Connomic rector of Planning and Community Development for the Town of Stratham. "The Ross land connects to Stratham Hill Park and to the extensive trail system that is already on the property. In fact, most people who walk the Ross property think they're at the park."

Snapping this property into the town's recreation puzzle will officially add nearly 0.7 miles of trails for walking, biking and snowshoeing to the existing outdoor recreation network encompassing the 465 acres of Stratham Hill Park and the Gordon Barker Town Forest.

The Mystery of Dead Fish Trail

One of the beloved trails on the soon-to-be-conserved Ross property is the bizarrely named "Dead Fish Trail." A well-liked narrow single-track (particularly enjoyed by mountain bikers), the Dead Fish Trail ends near Stratham Memorial School and is known as a great owl habitat.

But...why "Dead Fish" when this trail is nowhere near a pond or waterbody that could support fish?

"When the trail was being laid out, we came across a dead fish," Seth says "Our theory is that a bird had grabbed it from Great Bay and dropped it in the woods." An osprey's or maybe even a bald eagle's lost meal lives on in the naming of the trail.

The existing trails are enjoyed year round. SETH HICKEY

"It's such a valuable acquisition for the town and for the residents to have access," said Seth Hickey. Parks and Recreation Director for Stratham. "When I'm out there at the park, near the school there's always children and teachers getting out and exploring. Having this land conserved so close gives the kids a vested interest in the open spaces that are out there."

The Ross project is the third project that SELT and the Town have partnered on at Stratham Hill Park. Each of the prior projects – conservation easements on the Short property and Barker's Farm – supported continued public use and Town management of the existing trail network, which draws in people from all over the region for biking, running, and more.

Conservation outcomes do not always require SELT to be the legal owner or easement holder. For this project, SELT is playing an "assist" role, which means that SELT has facilitated the negotiations with the landowner and helped the Town secure a purchase agreement with the landowner, assisted in the grant writing, and is managing all of the acquisition due diligence on behalf of the Town. With assists, SELT has no legal interest in the property.

"SELT is an invaluable partner to us," said William McCarthy, member of the Stratham Conservation Commission. "SELT brings a lot of knowledge about how to execute easements, which easement language is appropriate, and what grant resources are available."

Congratulations and thous you for working to be bring this project to a happy and he aders like you keep Stratham in the variguand-oud a great place to live - Best wishes, Best wishes, Best wishes,
